Balance & Relax

Dream, the New Ergonomic Chair - Can support a variery of work states, focus on work or relax communication. Dream's excellent design allows the pelvis to tilt forward naturally and the spine to a naturally balanced position. Meanwhile, the upper body is optimally supported, allowing the body to achieve the best of natural balance and relaxation.

Studies have shown that traditional "right-angle" sitting can lead to poor back support, weaken major muscle groups, and ultimately lead to a variety of lifestyle ailments. The most effective pose for sedentary people is to create an open angle between the thighs and torso, with the hips as a fulcrum. This rotates the pelvis forward until the spine reaches its natural balance.
